Ref #: PNR-F—0901-012 Rev 1

Product Release

Introduction date: January 19, 2009

Dear PlymoVent Partner,

PlymoVent's Product Management is pleased to announce a new product release for the EPA07 vehicle market.

This newly designed 5" Heavy Duty conversion kit is constructed utilizing stainless steel tube. This fully welded construction ensures a reliable and predictable production. The design offer two stages of ambient air induction, which sufficiently decreases the exhaust gas temperature (EGT) prior to exiting the tailpipe.

This 5" Heavy Duty conversion kit, meets the NFPA1901 exhaust gas temperature guideline of not to exceed 851°F.

Product availability – January 19, 2009

Product	Article Number
5" Heavy Duty Conversion Kit	805517
